

Rapla County Government project "The community-based prevention with youth at risk and developing networking in Rapla County" received support from the European Economic Area grant programm.(EEA Grants)

The project will last 18 months, 01.07.2014-31.12.2015  
Grant is 54 555 euros, 10 105 euros self-financing partners; The total cost of the Project is 64 660 euros.

Project partners are all 10 local governments of Rapla County and Rapla Child welfare association.

Our Project will focus on risk prevention and strengthening the networks in the county and also at local municipalities of the Rapla county. This Project will provide activities for children and youngsters who are living in conditions of risk. Usually they: live far from centres, they have only one parent, their parents may be unemployed, they have had difficulties at school and they also may have had troubles with compliance with law. In every local government group of youngsters will gather twice a month, they´ll do some adventure activities and they´ll have, so called, educational movie events with discussing about movies. Second part of project will focus to the Network around the children and youngsters. Project will provide many trainings to improve professional skills of specialists from local governments. We are going to work out tools for local governments to make networks more effective. Youthworkers will learn new skills through supervision. One part of the network are also parents- we will provide counselling and help for them. The main aim of the project is to make existing networks stronger and more effective and reduce the risk behaviour of youngsters.
